

Product stability and reliability are first-class.

“ We take 'creating value for customers' as our business tenet, we see the same from Mitsubishi Electric. ”

Mr. Jin Weijian, General Manager of Qingdao Golden Packaging Machinery

Global Partner. Local Friend.

Let me tell you my story: Since 2001, we at Qingdao Golden Packaging Machinery wanted to be on the "fast track" of the packaging industry in China. Steadily we have been able to achieve this and can number our customers amongst the top domestic and international Food & Beverage and pharmaceutical companies, including not least Unilever, Nestle, MEIJ, Yili for example. With the technical support from Mitsubishi Electric and our mechanical systems partner Qingdao Keling, we are focused on comprehensive packaging solutions based on the e-F@ctory framework. In today's world of intelligent manufacturing, only by mobilizing the resources of the entire value chain through tools like e-F@ctory can deeper manufacturing insights be gained. Thanks Mitsubishi Electric.
